MIXTURES OF MATERIAL Rec'd PCT/PTO 2 4 AUG 2001

THIS INVENTION relates to mixtures of materials.

According to the invention, a settable mixture comprises polybutadiene, a flow-

enhancing liquid, and dry particulate material, the latter having no more than 2% water

content and containing no more than 2% Aluminium Oxide, and no more than 1%

Ferrous Oxide, the percentages being by weight of particulate material.

The flow-enhancing liquid may be a flow-enhancing solvent.

The particulate material may comprise dry sand being at least 90% silica sand;

ground or crushed glass, for example, including recycled glass and ground or crushed

glass products which may include some non-glass material; ground slate or other

mineral, for example granite or stone. However, preferably the particulate material as

a whole should not contain more than 1.4% by weight of Aluminium Oxide, nor more

than 0.5% by weight of Ferrous Oxide.

The particulate material may be a mixture of different materials.

The polybutadiene may be in liquid form.

The settable mixture may contain a re-odoriser.
